types of digital marketing campaigns do you
run?","acceptedAnswer":{"@type":"Answer","text":"This depends on your goals. When
determining your goals, think about your target customers and the problems they face. For
example, if you sell supplements and fitness goals are a common struggle, we would focus on
this with our digital marketing campaigns. We could also consider specific markets and
demographics.\n\nFor example, if you sell skincare products that target women, we could
target mothers with your marketing campaigns. This can help us tailor your messages and
increase the overall effectiveness of your campaigns."}},{@type:"Question","name":"How
Much Does Digital Marketing Cost?","acceptedAnswer":{"@type":"Answer","text":"Digital
marketing services are priced based on the number of people involved (such as the size of
your team and the number of hours they spend on your project). The number of hours (or
task) required to complete a given project will determine the cost of that project. The project
size will also affect the cost. Project size is based on a few different factors, such as:\n\nThe
number of keywords (or phrases) you want to be included in your campaign\nThe number of
websites you want to promote\nThe length of the content\nThe number of emails you want to
be sent\nThe project budget will also depend on the service you choose. Some companies
offer services at a fixed price, while others have a pricing model based on the number of
visitors you get to your website."}},{@type:"Question","name":"What is the difference
between a digital marketing and search
agency?","acceptedAnswer":{"@type":"Answer","text":"Digital marketing is the strategy and
execution of all marketing efforts that use technology as a vehicle. Search marketing and SEO
are just two components of digital marketing. With a digital agency, you\u2019re outsourcing
the management and execution of your digital marketing campaigns. Some digital agencies
specialize in digital marketing.\n\nOthers offer a variety of services, and then some are
experts in digital marketing and can advise you on your overall strategy. A digital agency can
help you choose the best digital marketing channels, set goals and metrics, and manage your
campaigns."}},{@type:"Question","name":"Things You Should Know Before Hiring a Digital
Marketing Agency?","acceptedAnswer":{"@type":"Answer","text":"Digital marketing is a
fast-changing field, which means you need to be flexible and willing to experiment. If
you\u2019re new to the scene, you may be tempted to hire a digital marketing agency that
has worked with other brands before. But you should be wary of hiring an agency that just
rehashes the same tactics and strategies.\n\nMake sure that the agency you decide to work
with has experience with digital marketing strategies tailored to your industry. For example, if
you sell skincare products, you wouldn\u2019t want an agency that has experience with SEO
strategies for supplement retailers."}},{@type:"Question","name":"Are there any SEO tricks

White-hat SEO tricks are used to improve the ranking of your website in search engine results pages (SERPs).\n\nSome SEO tricks you can use include optimizing your website for the various search engines, creating high-quality content, and using the right keywords and phrases. There are many SEO tricks and SEO strategies, but most are not ethical or effective.\n\nWe optimize your website for the various engines by adding keywords and phrases throughout your site. - [Best PPC Agencies in India: The 2026 Vetted List](https://www.nicodigital.com/performance-marketing/best-ppc-agency-india/): India has thousands of agencies claiming to run paid media and only a fraction that can prove ad spend turned into revenue. This 2026 list gives you an eight-factor scorecard for evaluating any PPC agency in the country, names the ones worth shortlisting, maps each to the brief it is genuinely best at, and shows what management actually costs across metro tiers.

- [Best PPC Agencies in Bangalore: The 2026 Vetted List](https://www.nicodigital.com/performance-marketing/best-ppc-agency-bangalore/): Bangalore's paid-media market is shaped by SaaS, D2C and fintech - long sales cycles, expensive customer acquisition, and a lot of accounts optimising toward the wrong number. This 2026 list shows you how to evaluate any Google Ads or paid-media agency serving the city, names the ones worth shortlisting, and maps each to the brief it is genuinely best at.

- [Zero-Click Search Cost Us Traffic but Won Us Clients](https://www.nicodigital.com/analytics/how-to-measure-zero-click-search/): Organic sessions fell. Inbound enquiries rose. Both numbers were correct, and for two months we could not explain the gap to the client because our reporting only counted one of them. Zero-click search does not destroy demand, it relocates it - out of your sessions report and into branded search, direct traffic and the sentence a prospect says on the first call. This is the five-signal framework we built to measure the part that stopped showing up in Analytics, including the exact Search Console and GA4 steps, and the point at which a traffic drop really is just a traffic drop.

- [How to Rank in AI Overviews: A Diagnostic Playbook](https://www.nicodigital.com/seo/how-to-rank-in-ai-overviews/): Most AI Overview advice is a list of tips that assumes every page fails for the same reason. It does not. A page can miss the citation at five separate points - the query never triggers an Overview, your URL never enters the candidate pool, your page has no liftable passage, the synthesised answer does not need your claim, or the link lands on the wrong URL. Each failure looks identical from the outside and each needs a different fix. This is the diagnostic we run to find which gate a page is failing before writing a single word.

- [The Metrics We Stopped Reporting to Clients and Why](https://www.nicodigital.com/analytics/metrics-we-stopped-reporting-to-clients/): Our monthly client report used to run past twenty pages. Almost none of it changed a decision. So we deleted nine metrics - average keyword position, impressions, Domain Authority, bounce rate, headline sessions, backlinks acquired, time on page, crawl stats and the activity log - and rebuilt the report around three layers instead. This is what each metric was actually doing, why it

had to go, what replaced it, and how to run the same cut on your own reporting without losing the client's trust.

- [We Pitched 30 Journalists AI-Era Angles: What Got Replies](https://www.nicodigital.com/content-marketing/we-pitched-30-journalists-ai-era-angles/): We hand-picked 30 journalists and pitched them five different kinds of story angle - original data, contrarian correction, timely commentary, expert-source offer, and client announcement - then tracked every reply and every placement. The data angle pulled a 67% reply rate. The announcement angle pulled zero. This is the full experiment: the method, the angle-by-angle results, what correlated with replies beyond the angle itself, the pitch anatomy that worked, and the 30-day version you can run yourself.

- [How to Choose an Amazon SEO and PPC Agency in India](https://www.nicodigital.com/ecommerce/amazon-seo-and-ppc-agency-india/): Every Amazon agency in India sells you the same promise: we will bring your ACOS down. That promise is close to worthless, and we can prove it with arithmetic - there is a version of every account where ACOS improves, TACOS improves, and the business makes less money. This is the buyer-side guide the category does not have: why splitting listings and ads across two vendors breaks the flywheel, the retail-readiness gate that makes ad budgets pointless, the five fee models and what each one quietly optimises for, and the twelve questions to ask a shortlist along with the answer that should end the conversation.

- [SEO for Architecture and Construction Firms in India](https://www.nicodigital.com/seo/seo-for-architecture-and-construction-firms/): We pulled the July 2026 India search data for architecture, construction and interiors and found something odd: 74,000 monthly searches for 'interior designers near me' at a keyword difficulty of 5, and 6,600 for 'construction company in bangalore' at a difficulty of 1. The demand is enormous and almost nobody is competing for it properly. This is the full playbook - the four AEC buyer journeys, the page architecture that ranks, the portfolio-crawlability problem that quietly kills most firm websites, the calculator play that captures 12,100 searches a month, and how AI assistants are already recommending firms in this category.

- [PPC vs SEO Cost: The Real Numbers for India](https://www.nicodigital.com/performance-marketing/ppc-vs-seo-cost-comparison-india/): Every PPC vs SEO cost comparison on the internet is priced in dollars. This one is priced in rupees, with the full invoice for both channels, cost per lead by industry, and a 24-month model showing exactly which month organic overtakes paid - and why the honest crossover is five months later than most agencies claim.

- [SEO Audit Cost in India: What You Should Expect to Pay](https://www.nicodigital.com/seo/seo-audit-cost-in-india/): Ask three agencies to quote an SEO audit and you will get ₹4,999, ₹45,000, and ₹2.5L - all three called an SEO audit. This guide explains what each price band actually buys in India in 2026, reverse-engineers any quote into the hours behind it, prices the AI-search layer most proposals still leave out, tells you honestly what a free audit is worth, and gives you a five-step method to set your own budget.

- [Best Digital Marketing Agencies in Surat: A 2026 Buyer's Map](https://www.nicodigital.com/digital-marketing/best-digital-marketing-agency-surat/): Surat cuts most of the world's diamonds and weaves most of India's man-made fabric - and its digital marketing agencies are built around that economy: social-first, creative-heavy, priced low, and

mostly silent on AI search. This 2026 map shows you how to evaluate them, names the agencies worth a look, explains what each is genuinely good at, and tells you which channels actually matter for your kind of Surat business.

- [SEO vs Content Marketing: How They Work Together](https://www.nicodigital.com/content-marketing/seo-vs-content-marketing/): SEO and content marketing are not competing budget lines - they are two halves of one system, and roughly 70 percent of the work belongs to both. This is the operating model: what each discipline genuinely owns, where the real overlap sits, the seven failure modes that appear when you split them into separate teams, how to allocate budget by company stage, the shared scorecard that stops the two functions reporting conflicting numbers, and why AI search has made the separation more expensive than it has ever been.

- [SEO for Jewellery Brands in India](https://www.nicodigital.com/seo/seo-for-jewellery-brands-in-india/): Jewellery is one of the hardest categories to rank in India - high trust stakes, ferocious brand competition from Tanishq to Giva, and a buyer who researches for weeks before spending. This is the full playbook: the three buyer journeys you have to win, the product and collection page architecture that actually ranks, the trust and schema signals Google and AI assistants demand of a YMYL purchase, local SEO for showroom-led jewellers, and the D2C organic strategy that let brands like Giva and Palmonas scale without out-spending the legacy houses.

- [We Ran a 162-Page Programmatic SEO Experiment. Here's the Honest Result](https://www.nicodigital.com/technical-seo/programmatic-seo-experiment-162-pages/): Every programmatic SEO case study you can find online is a success story. This one is not. We published 162 templated pages across three template types, tracked them for six months, measured the crawl cost to the rest of the site, pruned 96 of them, and checked whether any of it got cited by AI engines. Eleven pages carried the entire program. Here is the full data set, the template that actually worked, and the six rules we now apply before we let a client build one of these.

- [What Is AEO? Answer Engine Optimization Explained Simply](https://www.nicodigital.com/seo/what-is-aeo-answer-engine-optimization/): AEO stands for Answer Engine Optimization - the work of getting your business named and quoted inside the answers that ChatGPT, Perplexity and Google's AI Overviews write for your buyers. Most explainers stop at the definition. This one shows you the actual before-and-after of a page rewritten for AEO, the five things that genuinely move citations, the four that don't, and a first-week checklist you can run without buying a single tool.

- [Best SEO Agencies in London (2026): A City Shortlist](https://www.nicodigital.com/seo/best-seo-agency-london/): London is one of the most competitive SEO markets on earth - a single dominant capital where review stars, award walls, and now AI-search visibility decide who wins. This 2026 city shortlist shows you how to evaluate the agencies serving London brands, what each is genuinely strong at, and how to pick the right partner for your brief.

- [We Audited 50 D2C Brands for AI Visibility. Most Were Invisible](https://www.nicodigital.com/seo/we-audited-50-d2c-brands-for-ai-visibility/): We ran 50 Indian D2C brands through a structured AI-visibility audit - asking ChatGPT, Perplexity and Gemini the real questions their buyers ask, and recording whether the brand ever surfaced. 38

of 50 never appeared once. This is the full study: the method, the scores, the five reasons brands were invisible, what the three visible outliers did differently, and the scoring framework we now use to make any brand AI-recommendable.

- [How We Rebuilt a Blog to Answer Questions LLMs Actually Ask](https://www.nicodigital.com/content-marketing/how-we-rebuilt-a-blog-for-llm-questions/): We took a blog built for keyword rankings and rebuilt it, post by post, to answer the questions people actually type into ChatGPT, Perplexity and Google's AI Overviews. This is the five-step rebuild we ran - how we found the real questions, restructured every post around one answerable question, made the answers extractable, added the corroboration layer engines trust, and wired the whole thing into an entity graph - plus what changed and what we would do

differently.

- [How We Decide Which Clients Are Worth a GEO Strategy (and Which Aren't)](<https://www.nicodigital.com/seo/which-clients-are-worth-a-geo-strategy/>): Generative Engine Optimization is being sold to everyone, but it is worth funding for only a fraction of the businesses that ask us for it. This is the internal five-signal framework we use to decide who should invest in GEO now, who should wait, and who should spend the money somewhere else
- written so you can run the same qualification on your own business before anyone sends you a proposal.

- [Best PPC Agencies in Delhi NCR (2026): A Vetted Shortlist](<https://www.nicodigital.com/performance-marketing/best-ppc-agency-delhi/>): Delhi NCR is India's deepest - and most expensive - paid-media market, which makes choosing the wrong agency costlier here than almost anywhere else. This 2026 shortlist shows you how to evaluate any Google Ads or paid-media agency serving the capital region, names the ones worth shortlisting, and shows where each is the right fit.

- [The Real Cost of Producing AEO Content at Scale](<https://www.nicodigital.com/content-marketing/cost-of-producing-aeo-content-at-scale/>): AEO-first content costs more to produce than the SEO articles it replaces, and most teams budget for the old thing while trying to buy the new one. This is the honest breakdown from our own production line: what a single answer-engine-ready content unit actually costs to build, the four line items that make it more expensive than a standard blog, where the cost curve bends at scale and where it stays stubbornly flat, and why cost-per-unit is the wrong number to optimise in the first place.

- [Link Building Cost in India: Agency vs In-House vs Tools](<https://www.nicodigital.com/seo/link-building-cost-in-india/>): What does link building actually cost in India in 2026? There is no single answer, because there are three completely different ways to buy links: an agency, an in-house hire, or a tools-and-DIY stack. This guide gives you the real INR numbers for each - per-link tiers by domain authority, honest monthly retainer ranges, and the true loaded cost of an in-house link builder that most brands underestimate by half - plus a framework to decide which model fits your budget and stage.

- [Best Digital Marketing Agencies in Chennai (2026): A Vetted Guide](<https://www.nicodigital.com/digital-marketing/best-digital-marketing-agency-chennai/>): Chennai runs on a rare mix - the OMR IT and SaaS corridor, the Sriperumbudur automotive belt, a heavyweight healthcare and BFSI sector, and one of India's strongest regional-language consumer markets. Its digital marketing agencies reflect that spread. This 2026 guide shows

how to evaluate them, names the agencies worth your time, and maps each to the brief it is genuinely best at.

- [Best SEO Agencies in Goa (2026): A Coastal-Market Shortlist](<https://www.nicodigital.com/seo/best-seo-agency-go/>): Goa's SEO market is small, seasonal and hospitality-led - resorts, villas, destination weddings, restaurants and a growing creator economy, served by a mix of local boutiques and national shops. This 2026 shortlist shows you how to evaluate them, names the agencies worth a look, and explains what each is genuinely good at - so you can weigh anyone you talk to against your own brief.

- [CRO Agency in India: Conversion Rate Optimisation Guide](<https://www.nicodigital.com/performance-marketing/cro-agency-india/>): A conversion rate optimisation agency makes the traffic you already pay for convert more often, so every rupee of ad spend and every SEO ranking works harder. This guide explains what a CRO agency actually does, how the testing loop works, what CRO costs in India, and how to choose a partner - without paying for guesswork dressed up as strategy.

- [SEO vs PPC: Which Should You Invest In First?](<https://www.nicodigital.com/performance-marketing/seo-vs-ppc-which-to-invest-in-first/>): SEO vs PPC is not a philosophy question, it is a sequencing question. Here is the decision framework we use to tell a business which one to fund first, based on cash position, margin, sales cycle, and how much demand already exists for what they sell.

- [The Content Formats LLMs Cite (and the Ones They Ignore)](<https://www.nicodigital.com/digital-marketing/content-formats-llms-cite/>): We spent nine months tracking which of our own pages ChatGPT, Perplexity and Google's AI Overviews actually cited - and which ones they never touched, no matter how well they ranked. The pattern was clear enough to change how we brief every piece of content. Here are the six formats that earned citations, the five that never did, and the structural rule underneath all of it.

- [What Indian D2C Brands Get Wrong About SEO in the AI Era](<https://www.nicodigital.com/seo/what-indian-d2c-brands-get-wrong-about-seo-in-the-ai-era/>): Most Indian D2C brands are still running a 2019 SEO playbook while their buyers have quietly moved half their research into ChatGPT, Perplexity and Google's AI Overviews. Here are the six mistakes we see most often - from chasing keywords instead of questions to confusing a fast Shopify theme with technical SEO - and what to do about each this quarter.

- [How to Choose an SEO Agency in India: 12 Questions to Ask](<https://www.nicodigital.com/seo/how-to-choose-an-seo-agency-in-india/>): Most SEO agencies fail their clients in the first 90 days - not because they can't do the work, but because the buyer never asked the right questions before signing. This is the exact 12-question vetting script we'd hand a business owner shortlisting SEO agencies in India, with what a strong answer sounds like and the red flag that should end the conversation.

- [What Building an In-House CRM Taught Us About Our Own Sales Funnel](https://www.nicodigital.com/marketing-strategy/in-house-crm-sales-funnel-lessons/): We built our own CRM to fix a reporting problem and ended up exposing five lies we'd been telling ourselves about our sales funnel. Here are the lessons - the funnel stages that didn't exist, the leak that wasn't where we thought, and the framework you can borrow without writing a line of code.

- [What We Learned Running SEO, AEO and GEO for One Client](https://www.nicodigital.com/seo/running-seo-aeo-geo-for-one-client/): We ran SEO, AEO and GEO in parallel for a single D2C client for nine months - same content engine, three different surfaces, three different scoreboards. Here is what actually overlapped, what didn't, where the budget went, and the uncomfortable lesson about which discipline we'd run first if we could only pick one.

- [Best SEO Agencies in Canada (2026): A National Shortlist](https://www.nicodigital.com/seo/best-seo-agency-canada/): Canada's SEO market is fragmented across Toronto, Vancouver, Montreal, and Calgary - and shaped by something no other North American market has: mandatory bilingual, Bill 96-compliant search. This 2026 national shortlist shows you how to evaluate the agencies serving Canadian brands, what each is genuinely strong at, and how to pick the right partner for your brief.

- [Technical SEO vs On-Page SEO: What Matters More?](https://www.nicodigital.com/technical-seo/technical-seo-vs-on-page-seo/): Technical SEO vs on-page SEO is the wrong fight - they are layers, not rivals. Here is the honest answer on which one to fix first, with a diagnostic to find the layer that is actually capping your rankings.

- [How Long Does SEO Take to Work? A Realistic Timeline](https://www.nicodigital.com/seo/how-long-does-seo-take/): The honest answer to how long SEO takes is three to six months for early movement and six to twelve months for meaningful traffic and leads - but the real timeline depends on five variables most agencies never explain. This guide breaks down the SEO timeline month by month, the factors that speed it up or slow it down, the leading indicators that prove it is working before rankings move, and how the timeline differs for local, ecommerce, and national SEO in India.

- [Best PPC Agencies in Kolkata (2026): A Vetted Shortlist](https://www.nicodigital.com/performance-marketing/best-ppc-agency-kolkata/): Kolkata's PPC market runs the full range - from ROI-accountable performance shops to agencies that simply spend the budget and report clicks. - [SEO for Pharmaceutical Companies: A Compliance-First Playbook](https://www.nicodigital.com/seo/seo-for-pharmaceutical-companies/): Pharmaceutical SEO is not regular SEO with a lab coat on. It is a YMYL, heavily regulated, multi-audience discipline where the wrong claim is a legal risk and the right content earns citations from Google and AI engines alike. This playbook shows you exactly what to build, how to stay compliant, and how to win visibility across patients, prescribers, and procurement.

adlift.com + adlift.in · Audited July–August 2026

Raw robots.txt, llms.txt, and structured-data capture. See Data Dictionary in the main dataset workbook for how these findings were scored.

NOTE ON ADLIFT.IN — this document includes captured evidence from both **adlift.com** (the verified AdLift entity, HQ Burlingame, CA) and **adlift.in**, a separate domain using a confusingly similar name. Our research found **adlift.in** to be an unconfigured website template — not the legitimate India presence of AdLift. It is included here only to document this finding, not as verified evidence for the ranked entity. Do not treat **adlift.in** content on the following pages as attributable to AdLift.

Digital marketing agencies offer a ton of cool services to help your business grow online, like:

Search Engine Optimization (SEO)

Content Marketing

Pay-Per-Click (PPC) Advertising

On-page SEO

Off-page SEO

Website Audits

Web Design

Web Development

Social Media Marketing

Email Marketing

Brand Management

Conversion Optimization

Basically they have many ways to get more people to notice your business online.

"acceptedAnswer": {
"@type": "Answer",

}
```

Digital marketing packages can range from INR 60,000 to INR 5,00,000 (\$720 – \$6000) per month depending on the services. Just like buying a toy or a gadget you often get what you pay for. If you want more services or need lots of help it will cost more. But the good news is even small budgets can get good results.

It takes 3-6 months to see results and sometimes up to a year or more for highly competitive industries. PPC (Pay-Per-Click) Advertising can show results in a few days to several weeks

but optimizing the campaigns for maximum return on investment (ROI) can take months. Just keep at it and be patient.

```

Services Offered: See what services a particular agency is offering. Make sure they offer the services you need like SEO, content marketing, social media management, web design and development etc.

Industry Knowledge and Specialization: Check if the agency has experience and expertise in your industry. An agency familiar with your market can understand your needs and challenges better.

Client Reviews and Testimonials: Read reviews and testimonials from previous clients to see how reliable, how well they perform and how satisfied their clients are. Positive feedback is a good indicator of their success rate.

Cost and Budget: Consider your budget and compare it with the pricing of different agencies. While cost is a big factor, don't sacrifice quality for a lower price. Look for an agency that offers a good balance of cost and value."
